Statement of Research Origin and Ownership

Minakshi Aggarwal

July 23, 2025

This document formally asserts that the research titled:

"Structured Polynomial-Time Solution to Subset Sum Problem: Implications for P vs NP"

is an original and independent work solely authored by me, Minakshi Aggarwal.

All logic, code, algorithmic flow, and data included in this work are entirely my own creations, developed through self-directed research without collaboration, institutional support, or external contribution.

This declaration is being made in light of interactions with an external researcher who, after initially expressing intent to review and endorse my work, subsequently requested access to internal components including my code and raw test data. These materials were shared in good faith based on the written assurance of endorsement and professional conduct.

This document serves as a formal and dated assertion of authorship, priority, and ownership over all core components of the above-titled work. Any subsequent use, adaptation, or derivative work based on this logic, code, or dataset without appropriate acknowledgment shall be considered a breach of academic ethics.
